WICKERSHAM IS RADICAL IN HIS SPEECH TODAY

Attorney General Speaking Before Minnesota Bar Association, Makes Sensational Declarations.

COMMISSION IS TO REGULATE CORPORATIONS

Advocates Regulation of Great Industrial Organizations in Same Way Commerce Board Regulates the Railways.

(By Evening Herald A. P. Leased Wire)

Duluth, Minn., July 18.—Attorney General Wickersham before the Minnesota State Bar association today took an advanced stand on the federal regulation of corporations, and said a government commission to regulate great industrial organizations in the same way that the interstate commerce commission regulates railways was desirable and might be necessary.

Mr. Wickersham's speech was little short of sensational in many of its features. He declared that it was a matter of serious consideration whether it would be practical to give to the proposed interstate corporation commission the power to fix prices.

Many of Mr. Wickersham's declarations were the most radical he has made since his entry into official life. There was nothing in the speech, however, to indicate how far the attorney general reflected the views of President Taft. On several occasions in the last year he has been regarded as the spokesman for the administration.

"That some further regulation of great corporations carrying on commerce among the states may be necessary," he said, "is coming to be a matter of current comment. It has been openly advocated quite recently by representatives of some of the largest combinations of capital, probably as a means of salvation, and to preserve, under government supervision, great organization whose continued existence is menaced by the recent interpretation of the Sherman act, the disintegration of which would be necessarily attended with much loss."

"To such it is a case of any port in a shipwreck." Better continued cooperative life, even under a protective master, than unorganized properties and segregated activities without constant governmental supervision.

Whether a federal industrial commission should have power to regulate prices is a matter of serious consideration. The interstate commerce law prescribes that prices for transportation by rail or wire or pipe line shall be reasonable, and that no unjust discrimination shall be made between individuals or localities similarly situated. A similar rule might be desired with respect to the prices of commodities, the subject of interstate commerce.

The state departments' attention was drawn to the situation in a telegram from the American consul Ensenada, who reported that Americans had been molested and had appealed to him for assistance.

Consul Wilson at Mexico City was immediately instructed to take up the matter with President de la Barra.

The renewal of a delicate situation in Lower California has increased the anxiety of the administration over recent developments in Mexico.

MEXICAN TROOPS ARE ORDERED TO LOWER PART

San Diego, Calif., July 19.—One hundred Mexican troops have been ordered from Ensenada to the district around Alamo, where a small band of rebels or bandits is said to be operating. Most of the ranches owned by Americans and foreigners are in the northern part of Lower California. During the recent revolt they suffered considerably from raiding parties of rebels and bandits.

AMERICAN RANCHERS BEING THREATENED

Washington, July 19.—American ranchers in Lower California are threatened by the so-called Mexican liberals there. The United States today requested the government of Mexico to afford them adequate protection.

The state department's attention was drawn to the situation in a telegram from the American consul Ensenada, who reported that Americans had been molested and had appealed to him for assistance.

Consul Wilson at Mexico City was immediately instructed to take up the matter with President de la Barra.

SUFFRAGIST LEADER IS TO BLAME

(By Evening Herald A. P. Leased Wire) Chicago, July 19.—Opposition in the senate for opposing Canadian reciprocity and pride of the Democratic party for "having the moral courage and patriotism to support and sustain a Republican president," characterized a speech today of Senator Brown of Nebraska, in favor of the reciprocity measure.

"I want to express my grief, my profound grief," Senator Brown declared, "because the bill does not have the support of some of my friends in this body of whom I know all heart are in favor of lower duties. I do not complain of them. I do not charge them with insincerity, because I know them to be sincere. But I simply cannot understand them."

"It is beyond my comprehension to appreciate how in one session of congress, I could vote for lower duties. In the next session favor a revision of a few schedules, not with all the countries of the world, but with one country, a plan that I believe marks the beginning of the end of extortionate tariff duties in this country."

Thomas J. Conaty, bishop of the diocese of Los Angeles and Monterey, as a preliminary to ground breaking for the exposition.

The first spade full of earth was turned by President Taft's representative, John Barrett, director general of the Pan-American union. The Right Rev. service commemorated the founding of the California missions by the Franciscan fathers.

A feature of the ground breaking exercises was the unfurling of the president's flag, the American flag and the flags of the South American republics when President Taft pressed a button in Washington.

QUARANTINE LAW TO BE RIGIDLY ENFORCED

"Cholera Carriers" Are Discovered in Ports of Entry Hospitals As Result of Bacteriological Examinations.

(By Evening Herald A. P. Leased Wire)

New York, July 19.—The health officers of the whole country may be asked to help repel the threatened invasion of Asiatic cholera. The discovery of two "cholera carriers" among the new immigrants undergoing bacteriological examination at quarantine emphasized what Health Officer Doty has said about the difficulty of confining the disease to the quarantine hospitals of ports of entry.

Dr. Doty is conferring with Surgeon General Wyman, head of the U. S. marine hospital service, to plan how the country may be protected against carriers, who harbor the germs while themselves free from their ill effects. A system of general observation is contemplated so that even after the carriers are released from quarantine, the health authorities of the place where he sets may watch for possible transmission of the disease.

The following bulletin relating to the cholera situation was given out at quarantine at 9 a. m.

"At Hoffman Island early this morning Domenico Rancicelli, aged 65 years, one of the steerage passengers of the steamer Molice, was taken sick with symptoms suspicious of cholera. At the Swinburn Island hospital no further details have occurred. On board the Anchor line steamer Perugia conditions are satisfactory.

There was never a time that I tried to get one foot of ground at Controller Bay in Alaska that the request was not absolutely on the point. I never tried to use one bit of senatorial, social or any other interest in advancing my requests. Everything was based on pure justice.

I never wrote such a letter, such a postscript or such an addendum. I do not know Secretary Ballinger well enough to address him by any name except his formal title. I do not know President Taft's brother even by sight, and could not possibly refer to him. This note made public by this woman seems to me to be something crazy."
